Frequently Asked Questions

What is the purpose of tonight's meeting?
The purpose of tonight's meeting is to provide information on plans to construct J-turns, offset left turn lanes and acceleration and deceleration lanes at the intersection of Route 63 and Hinton Road/Calvert Hill Road in Boone County. The proposed work will provide a safer intersection for motorists using the roadways.

Why is this work necessary?
The existing intersection of Hinton Road/Calvert Hill Road and Route 63 has been the scene of approximately 53 reported accidents over the last 10 years. That includes two fatality, 4 disabling injury and 22 minor injury accidents. The improvements proposed at this intersection will eliminate or reduce the number and severity of the types of accidents that have been occurring.

How was the proposed plan developed?
MoDOT worked with a design focus group comprised of area residents, business owners, and emergency management service providers to develop ideas to improve the intersection.   The proposed plan was developed based on the group's feedback.

How will traffic be affected?
The proposed construction will take place adjacent to Route 63, Hinton Road, and Calvert Hill Road. Motorists should expect occasional lane closures. However, one lane of traffic will be open in both directions of Route 63 at all times and there will be access to Hinton Road and Calvert Hill Road throughout the duration of the project.

When will the work take place?
The project is scheduled to be awarded in June of 2014, with construction tentatively scheduled to take place during the summer of 2014.

Will additional right of way be needed to construct this project?
No. All construction will be completed within existing right of way.

How is this project funded?
The total project cost is approximately $1.6 million and is funded with MoDOT Safety Funds.

How can I learn more?
You may learn more by contacting us toll-free at 1-888-ASK-MoDOT (275-6636) or by visiting us on the Web at www.modot.org/central.
